Enhance sales and market penetration

Energetic

Confident

## Our Mission

To provide reliable information about integrity & genuine emotional reactions humans feel in various types of interactions and life situations, so we can serve mankind & justice and help to build a healthier and happier society.

In the call center space our technology improves sales and agent's performance. In the HR we assist managers make better recruitment decisions. Insurance entities use our technology to identify fraud at the first point of contact and expedite treatment for those who deserve it, and in the HLS & security worlds we assist investigators in the sensitive work of identifying the guilty ones from the masses of innocents.

## Our Solutions

**Financial insurance & fraud detection**

**HR recruitment & personality assessments**

**Call center performance monitoring solutions**

**HLS investigations & intelligence analysis**

## Our Technology

### Layered Voice Analysis (LVA)

A set of 151 tiny voice bio-markers and mathematical formulas that together can identify and scale 16 mental states and genuine emotions.

### Why Us?

Our technology was trained on real life data and is based on tens of thousands of real life cases, as opposed to acted simulations. Therefore, LVA is the only technology that can reveal HUMANS' GENUINE EMOTIONS.
